Education

Savitribai Phule Pune University

B. Voc in Software Development

Aug 2022 – June 2025

Sangamner, Maharashtra

Experience

DeepThought CultureTech Ventures Pvt Ltd, Hyderabad

March 2025 – Present

Software Developer Intern

Remote

- Developed and maintained full-stack web applications using Node.js, MongoDB, and Next.js
- Used carefully engineered AI workflows to build end to end products, from Business Context to User Experience to MVPs.
- Built internal tools and automations to optimize team workflows and reduce manual effort using AI so the teams can move on from operations thinking to systems designing.
- Building an AI-powered SaaS that will streamline our recruitment & onboarding process.
- Assisted new recruits by mentoring, resolving technical issues, and improving onboarding efficiency.

Projects

Querious - Fullstack Survey Builder & Analyser | *Express, React, PostgreSQL, Prisma*

Live | **Github**

- Developed **full-fledged features** for creating, submitting, and analyzing surveys, providing a seamless user experience.
- Used **Redux** to manage application state efficiently, ensuring smooth transitions between components and actions.
- Built a **robust backend** with **Express**, incorporating **authentication using email and JWT** for secure user management.
- Leveraged **Prisma** with **accelerated database connections** for optimal performance, ensuring fast and secure data retrieval and submission.

Slate - A Blog App | *Hono, Cloudflare, React, Tailwind, PostgreSQL, Prisma*

Live | **Github**

- Enabled users to **create, save, read, publish, and bookmark blogs**, providing a complete blogging solution.
- Managed state using **Recoil** for improved performance and flexibility in handling blog data.
- Used the **Hono library** to write a **lightweight and performant backend** and deployed it on **Cloudflare** for enhanced scalability and reduced latency.

DockStore - A Object Store | *Express, MongoDB, Redis*

Github

- Building a **storage architecture** with **flexible object organization** capabilities.
- Implementing comprehensive API endpoints for **uploading, retrieving, and managing files** across multiple projects.

Technical Skills

Languages : JavaScript, Typescript, SQL

Databases : MongoDB, PostgreSQL

Libraries / Frameworks : NodeBB, React.js, Next.js, Express.js

Devops / Cloud : Redis, Docker, Kafka, Kubernetes, Cloudflare, Vercel, Render, AWS

Testing / Monitoring : Postman, Grafana, Prometheus

Achievements / Extracurricular

- Won 1st prize for project exhibition out of 50+ teams which was organized at inter-college level during my academic year 2024-25.
- Achived 1st rank in Best Programmer competition for consecutive 3 years.
